

# Assignment No 2:-

**Q1) Which field of the Customers table is the primary key? give answer in 3-4 lines only**

**Ans** - The primary key of a table is the field that uniquely identifies each record.

It cannot contain duplicate or NULL values.

In the Customers table, the primary key is the field that stores the unique customer ID.

**Q2) Which field of the Customers table is the primary key? give answer in 3-4 lines only**

**Ans-** The 4th column of the Customers table is Rating.

It generally stores the credit rating or score assigned to each customer.

**Q3) What is another word for row? For column?**

**Ans-** Another word for a row is a record or tuple.

Another word for a column is a field or attribute.

**Q4) Why isn't it possible to see the first five rows of a table?**

**Ans-** The order of rows in the output depends on the row address, it will always be in ascending order of row address. Therefore it's not possible to see the First 'n' rows of a table.
